

Transforming the Outdoor Living Experience™

Digger Specialties, Inc. Magenta Star® Lighting Care and Cleaning Guidelines

Digger Specialties, Inc.'s Magena Star® Lighting Products add beauty, distinction, and a lasting value to your home. Your homes exterior requires cleaning and Magena Star® Lighting Products by Digger Specialties, Inc. are no different. Over time, with exposure to outdoor elements, your lights will show signs of normal weathering such as a slight loss of gloss and a slight color change. Cleaning your lights is the best way to protect your investment by minimizing the effects of weathering as well as removing dirt, grime, and other substances detrimental to the appearance of your lights.

Hand Washing Instructions:

1. Wet the Digger Specialties, Inc. Lighting Product with a garden hose (low pressure)
2. Hand wash all surfaces with a sponge, soft cloth, or soft bristle brush using a mild detergent (see recommendations below)
3. For best results start at the top of the product and work downward
4. Thoroughly rinse the product to remove all residues. Water with a high solids or mineral content may leave spots – for areas with these issues we recommend drying the product with a soft white cloth

Detergent Requirements:

1. General purpose household soaps and detergents are acceptable. Do not use any type of soap or detergent that recommends gloves or respirators for personal protection. Do not use cleaners containing organic solvents, undiluted chlorine bleach, liquid grease remover, nail polish remover, furniture polish and cleaners, chlorinated hydrocarbons, ketones, and/or esters. Do not use a soap or detergent that could damage a painted finish.

A Digger Specialties, Inc. Magena Star® Maintenance Log is required to be maintained for all Lighting Products. Disregarding this cleaning schedule will void the Digger Specialties, Inc. warranty.
